## SATELLITE SERVICES

### Two-Way Broadband Internet Solution (DVB-RCS)

Digital Video Broadcast with Return Channel System (DVB-RCS) is the fastest and the most efficient two-way Broadband Internet services ever offered by the VSAT industry.

Broadband Internet services using DVB-RCS can transmit up to 2 Mbps and receive up to 8 Mbps using a dish as small as 0.75m and no larger than 1.2m. This service can be adjusted to fit the requirement of all users such as individual users, business applications, corporate customers, Universities, Government institutes, Internet cafes and even ISP's.

DVB-RCS technology can be used for more than just the Internet, it is an ideal platform for VOIP, VPN networks with Video conferencing capabilities.

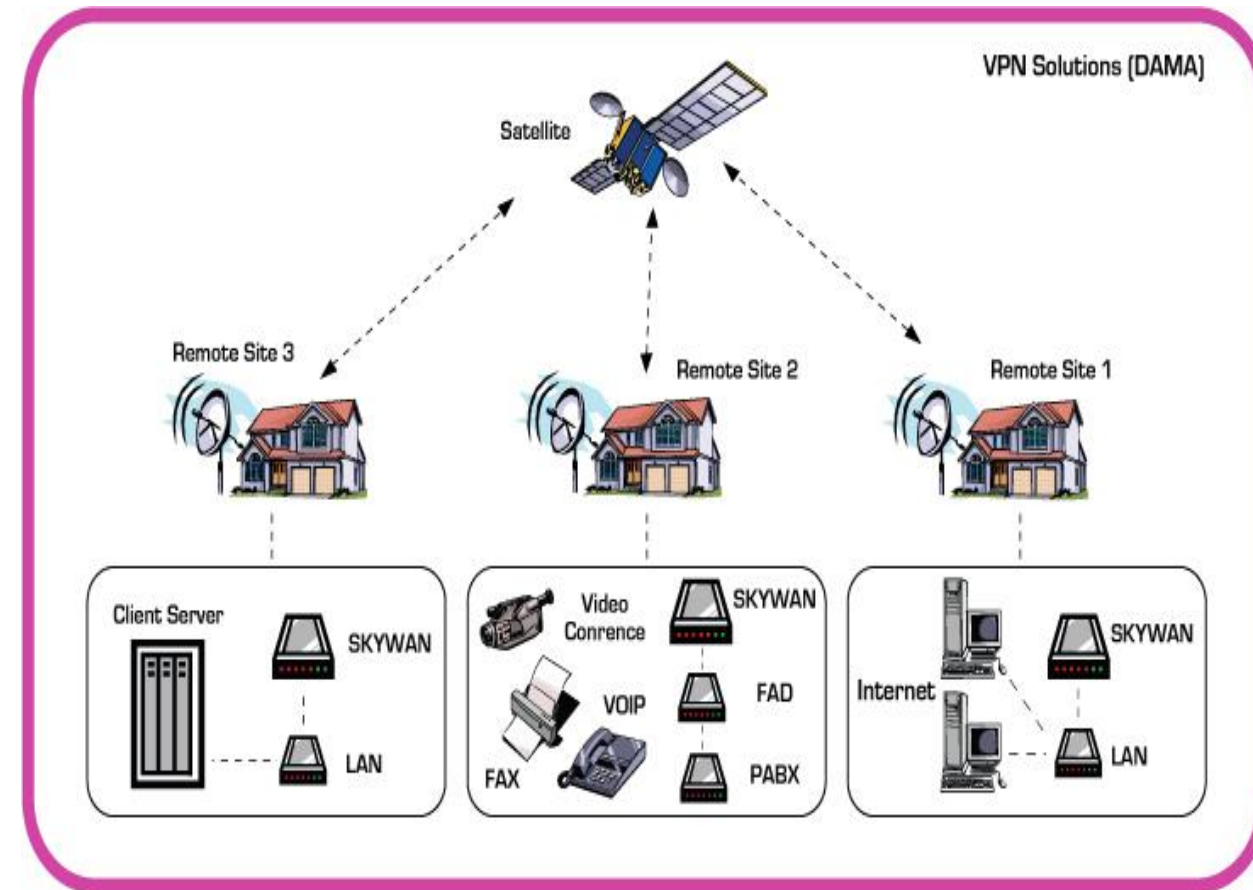

# VSAT

## SATELLITE SERVICES

### VPN Solutions (DAMA)

**DAMA (Demand Assignment Multiple Access)** is a VSAT system without a Hub that supports many applications in one network. Satellite Bandwidth (Transponder) cost saving is the greatest advantage of this system and it supports customer applications as IP, or Frame Relay protocols.

Using DAMA (Mesh) topology, QIG provide remote-to-remote direct connectivity using a single hop solution. QIG provides total DAMA turnkey solutions for designing the network, installation of the remote DAMA Terminals, commissioning and the remote maintenance, using a very powerful NMS (Network Management System). This service is most suitable for the requirements of Corporate customers, Banks, Defense organizations, Governmental institutions, Air Traffic Control and for Oil & Gas companies. It can also be utilized as an efficient application during disaster recovery as well as for connecting to the Global ISDN gateways for distance learning and Telemedicine.

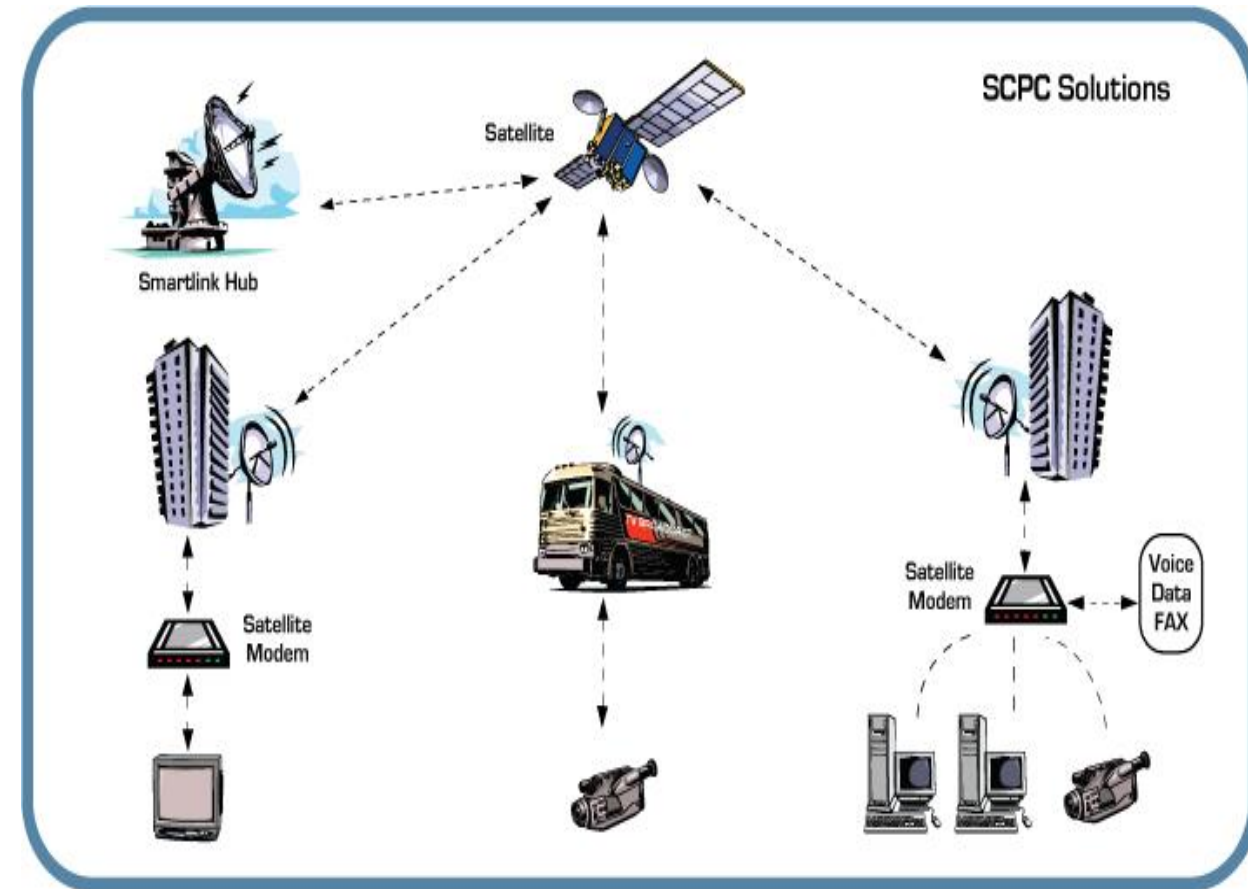

# VSAT

## SATELLITE SERVICES

### SCPC Solutions

SCPC (Single Channel per Carrier) system is suitable for any type of customer traffic. The Satellite Bandwidth for SCPC links is dedicated and permanently assigned for the mission critical customer applications. SCPC Service is most effective for providing clear multiplex voice/fax, data and video traffic to its customers.

provides NOC customer support on a 24 x 7 x 365 day basis. **QIG** communications can carry out the traffic analysis, link engineering, provisioning of space segment, sourcing and supply of customer premise equipment, installation and commissioning of the services.

# VOICE OVER IP (VOIP)

The Voice over IP (VoIP) telephony revolution has been a long time coming. Every business in every industry is rolling out VoIP applications. Vendors are reporting sales of millions of VoIP handsets. VoIP is recognized as the next telephony technology to be deployed.

**QIG** offers many services that can be grouped into two categories:

- **Managed Services**
- **Wholesale Carrier Voice**

# FLEET MANAGEMENT SOLUTIONS

**ORBCOMM** provides the industry's the most complete and integrated fleet management solutions for transportation and logistics, enabling real-time visibility and control of transport assets as they move across the supply chain. The result is improved operational efficiency, increased profitability, safety and compliance. From trucks, trailers and reefers to intermodal containers or railcars, our fleet telematics technology allows you to manage any asset from a single, easy-to-use platform.

TRACK, MONITOR AND CONTROL: ANY ASSET, ANYWHERE

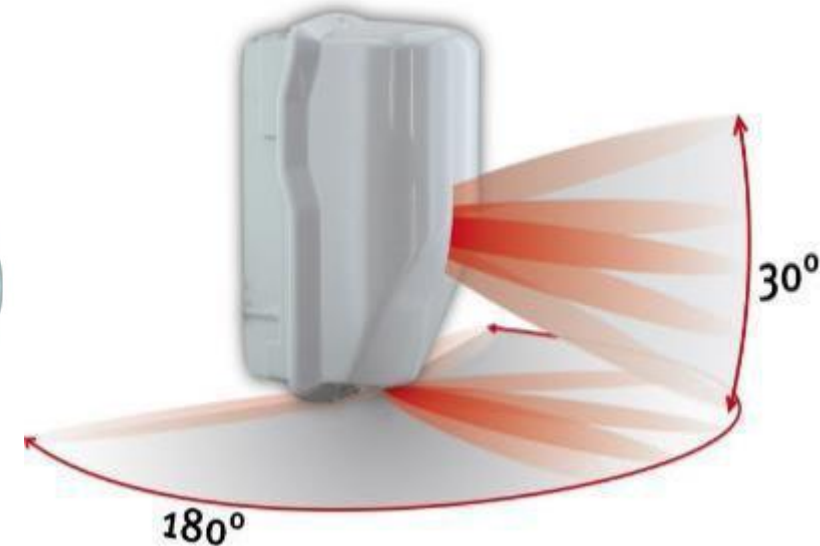

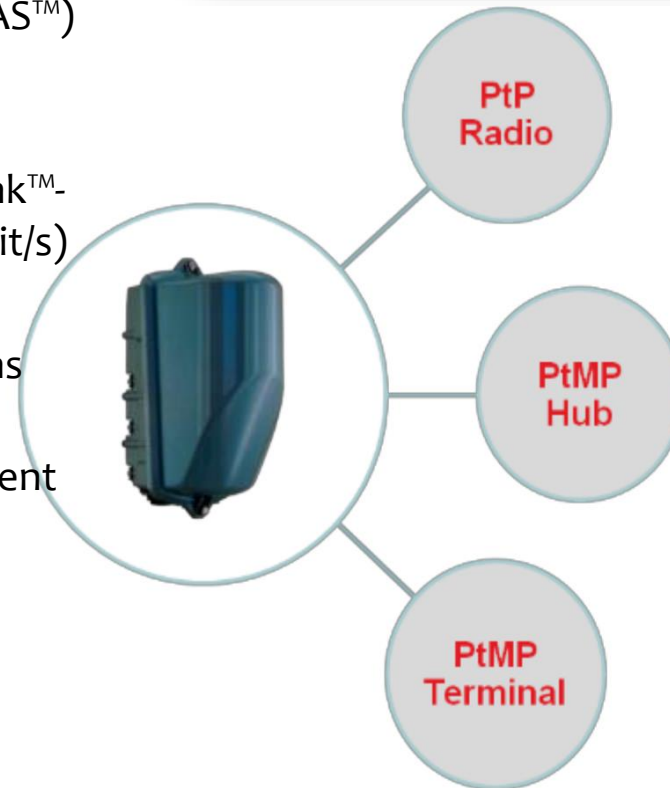

# MICROWAVE

## NETWORK SOLUTION

### StreetNode™ reaches any location with versatile connectivity

- Multi-Gigabit MW Transmission Solutions (OmniBAS™)
- 4G/5G Small-Cell Backhaul Units (StreetNode™, StreetNode™ V6o-PTP)
- E-Band Transmission and Access Systems (UltraLink™-FX80, UltraLink™-BX70, UltraLink™-GX80 for 10 Gbit/s)
- Software-Defined Radios (OSDR)
- Point-to-MultiPoint Fixed Wireless Access Solutions (WiBAS™-Connect)
- Network Management System and Site Management (uni|MS™)
- Antenna Systems
